

How This Viral AI Video Was Made

And How AI Is Transforming Social Media Growth

Introduction

This AI-generated video crossed **100,000+ organic views on Threads within just a few hours**.

No production team.

No advanced editing skills.

No expensive cameras or studio setup.

The entire video was created using **modern AI tools** that are now accessible to almost anyone.

This short guide explains:

- How this viral video was created (high-level overview)
- How you can create similar AI-powered videos
- Why AI is making social media growth easier than ever
- Who I am, and how I can help you go further

Note: This is an overview, not a step-by-step technical tutorial.

How This Video Was Made (High-Level Overview)

The process behind this viral post was **far simpler than most people expect**.

At a high level, it involved:

- Generating a cinematic visual concept using AI
- Enhancing realism with AI-driven image processing

- Adding subtle motion through AI video tools
- Posting the content in a **high-engagement format** optimized for social platforms

The most important takeaway:

AI handled the heavy lifting.

What traditionally required:

- Designers
- Video editors
- Animators

Can now be done by **one person**, using the right AI tools, prompts, and strategy.

How You Can Create Similar AI Videos

You **don't need**:

- A creative or design background
- Professional editing experience
- A large budget

What you actually need:

- A clear content idea
- The right AI tools

- An understanding of what performs well on social media

With AI, you can:

- Turn ideas into visuals within minutes
- Test multiple content formats quickly
- Create consistently without burnout

The barrier to entry is no longer **skill** —
It's **strategy and execution**.

Why Social Media Growth Is Easier With AI

AI doesn't magically make content go viral.

What it *does* is remove friction.

With AI:

- Content creation becomes faster
- Experimentation becomes cheaper
- Consistency becomes realistic

This leads to:

- More posts
- More testing

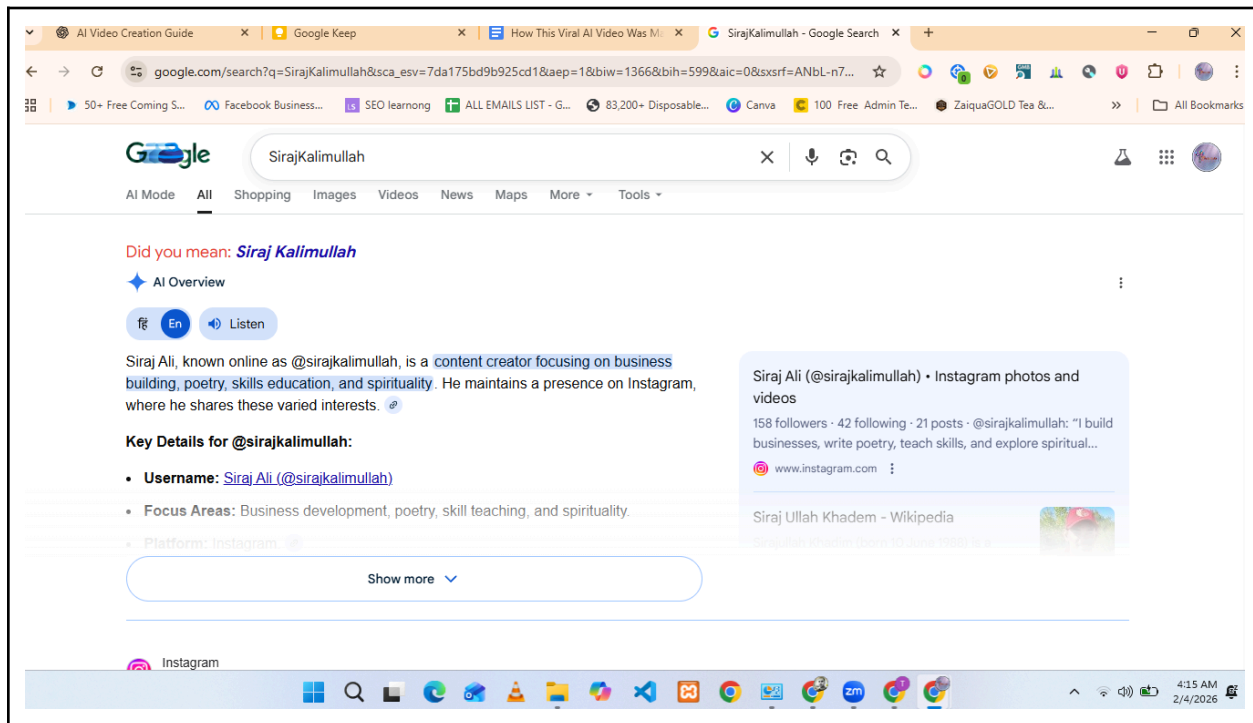

- More opportunities to win the algorithm

Creators who understand this early gain a **massive competitive advantage**.

AI is not replacing creativity —
It's amplifying it.

Who I Am

My name is **Siraj Kalimullah**
(also known as **Siraj Ali**)

I am a:

- Full Stack Freelancer

- AI Engineer
- Entrepreneur

With **9+ years of experience**, I've worked across:

- Software development
- Automation systems
- AI-driven workflows
- Digital growth strategies

I don't just study AI —

I use it daily in real-world projects and businesses.

This viral post is just one small example of what's possible when **AI meets strategy**.

About the Paid Guide (\$9)

[Buy Now](#)

After this post went viral, many people asked for deeper insights.

I'm considering releasing a **paid PDF guide (around \$9)** that would include:

- The exact AI tools I use
- Prompt structures (not just examples)
- My posting framework for maximum reach
- Common mistakes that kill growth

- How to reuse the same content across multiple platforms

Why \$9?

- Low entry barrier
- High practical value
- Focused, clear, and actionable

Perfect for people who want **clarity, not complexity**.

About the Complete “AI for SMM Growth” Course (\$49)

For those who want to go much deeper, I’m also planning a **complete course priced at \$49**.

This would cover:

- AI-powered content creation for social media
- End-to-end SMM growth systems
- How to use paid AI tools **for free (legally & strategically)**
- Automation workflows
- Scaling pages, brands, or client accounts

This is for people who want:

- Long-term growth

- Skill-based income
 - A real edge in the AI-driven content economy
-

Final Thoughts

AI is not the future of social media.

It is the present.

Those who learn to use it correctly will:

- Grow faster
- Create smarter
- Stay ahead while others struggle

If this free guide helped you understand what's possible,
the next step is learning how to do it **systematically**.

Thank you for reading.

More to come.
